HANDPRINT MONKEY

Making a handprint monkey is great fun and simple to do!
All you need is: some brown paint, coloured pens or pencils, glue and googly eyes!

1. Paint your hand brown. (This will be the body and legs of the monkey)
2. Place your painted hand down on a piece of paper and hold for a few seconds.
3. Paint in any gaps.
4. Paint a circle for the head and add in facial features and a tail, either with paint or an alternative.
5. Stick on two googly eyes.
6. And finally, draw vines and flowers in the background to give it that jungle feeling!
