

Toilet Roll Fish

We love this this toilet roll fish craft by Buster Books! All you need is tissue paper, googly eyes, glue, sellotape, string and scissors to make your fishy friend.

1. Cut out as many tissue paper scales as you need to cover the toilet tube and stick them on (2.5cm long each).
2. Add on the googly eyes near the top of the tube.
3. For the tail, cut out 8 strips of tissue paper, each 1cm wide and 15cm long. Then stick the top of these strips on the inside of the tube, with most of the strip hanging out the bottom.
4. Pierce two holes, one either side of the top of the tube and thread a piece of string through the holes, tying it in a knot at the top. And there you have a hanging fish!
