

Toilet Tube Butterfly

Here's how to make this pretty toilet tube butterfly. All you Need is some paint, scissors, glue and 2 x toilet tubes.

1. Paint one toilet tube in your preferred colour.
2. Leave the tube to dry then flatten and cut off 4 x 1.5cm wide rings and 1 x 0.5cm-wide ring.
3. Take the 4x 1.5cm rings and make 2 of them smaller by cutting it at one of the folded creases to break the ring, and cut off a 1cm strip from the end. Tape the ring back together to make smaller rings.
4. Arrange the four rings into a butterfly shape, with the two larger pieces on top and stick them together.
5. Take the 0.5cm ring and cut it in half, curl the ends round to make the antennae and stick on the top two wings.
6. Cut the second tube in half and paint each half a different colour.
7. Cut the two tubes in half and bend into your preferred shape.
8. Then stick them inside the 4 wings and your butterfly is complete!
