

Toilet Tube Sheep

Here's how to make your own pet sheep out of a toilet roll tube! All you need is 1 x toilet roll tube, white string or wool, scissors, glue and googly eyes.

1. To make the body of the sheep, flatten the toilet roll, then cut off two rings, both 0.5cm in width.
2. Then make a cut in both rings and stick the two rings together.
3. Wrap the string or wool around the rim of the circle until it's well padded, and the tube is completely covered. Secure the ends of the wool with glue.
4. To make a tail, scrunch up some more string or wool and glue it onto the body.
5. For the legs, cut a 3cm-wide ring of toilet-roll tube, flatten it, and make three triangular cuts, about 1cm apart.
6. Cut out the head of a sheep on the remained of the toilet roll tube. Add on googly eyes and stick onto the body. Then stick the body onto the legs and your sheep is complete!
