Footprint parrot

This footprint parrot is great fun for kids to make. All you need is a selection of paint, googly eyes and paper!

1. Paint your foot in your chosen colour.
2. Stamp down on a piece of paper with your painted foot, to make the body of the parrot.
3. Using orange paint, add a beak to the top of the parrot's body and stick on a googly eye next to where the beak meets the face.
4. Paint both your hands in two colours to create the feathers and wings of the parrot, then press down on the piece of paper.
5. Finally, add in a branch and leaves to the picture to create a more exotic image.
